# ACT INSTANTLY WHEN IT MATTERS THE MOST

Get alerts in real-time as soon as security violations occur

A traditional security system needs heavy investment in manpower and bandwidth. It also comes with latency issues and can only track an event after it has occurred. This makes the system reactive, and very often, it is too late to take action. The Smart AI Supervision device, on the other hand, is cost-effective, prompt and proactive. Powered by edge-based analytics, it provides advanced detection insights and sends instant alerts on your phone, enabling you to take action quickly. Now know where and when security breaches occur. Act immediately.

## BENIFITS

**DIY installation**  
Plug and play, no human intervention after installation

**Wi-Fi enabled**  
Onsite integration

**Edge-analytics powered**  
No dependence on server

**On-premise solution**  
No need to pull live video over poor network

**Subscription based**  
Flexibility to select features

**App controlled**  
Configure the device and view alerts in real time

Now stay a step ahead of security breaches. Get peace of mind and focus on what's most important - your business.

# CUSTOMIZED SECURITY FEATURES FOR YOUR PREMISES

Just select the features you need, pay for what you choose and get going

## PRODUCT FEATURES

Trespassing detection

Loiter detection

Crowd detection

Zone fencing

Multiple user access

### EASY-TO-USE MOBILE APP

The Smart AI Supervision device uses a dedicated IMPACT by Honeywell mobile app to send you instant alerts, so that you can view and share videos of suspicious activity right away. The app comes with a user-friendly, subscription-based engagement model that allows you to select detection features as per your needs.
