

REACH NEW LEVELS OF FUNCTIONALITY AND EFFICIENCY

The Versatility to Control More Systems

Spyder® Model 5 Controllers

Honeywell

FAST AND FLEXIBLE

Cut energy costs and drive new levels of functionality and efficiency with the Honeywell Spyder® Model 5 family of unitary controllers. Scalable to meet the needs of any application, they deliver flexible, freely programmable, demand-led control. The essence of Spyder Model 5 controllers is speed and flexibility. BACnet MS/TP-based unitary controllers offer fast download speeds, smart engineering and commissioning tools, SYLK technology, and flexible programming to achieve multiple configurations – even for complex applications requiring high I/O count.

FEATURES & HIGHLIGHTS

“All-In-One” Tool

- Effective workflows for Unitary, Plant and Supervisor programming and application testing
- Designed to control terminal units such as 2- and 4-pipe fan coil units, chilled ceilings, hydronic, air quality control, and more
- Supports fans up to 3 stages, variable fan speed drives (VSDs), and thermal, floating and proportional actuators

Commissioning Ease

- Automatic creation of application documentation
- Bulk engineering template lets you batch download for similar projects
- Fast differential application download for quick optimization
- Function block library

Integrates With Other Building Systems

- Part of the Niagara network
- Fast binary I/O points for lighting control applications

Spyder Controllers – At A Glance

| Spyder Controllers | Live Programming | Bulk Engineering | Memory Capacity | I/O | | | | Relay Output | Communication Protocol |

| PUx-4024S | | | 372 Kb | 2 | 4 | 4 | 0 | 0 | BACnet MS/TP or LON |

Ordering Information

| OS NUMBER | DESCRIPTION |
|-----------|--|
| WEB-RS5N | Spyder Model 5 Unitary Controller, 14 total I/Os |
| WEB-RL6N | Spyder Model 5 Unitary Controller, 24 total I/Os |
