

MORLEY LITE FIRE ALARM CONTROL

Honeywell Morley Lite is a Compact, High Performance, Feature enriched Fire Alarm Control Panel designed to meet the Fire Detection Addressability.

Honeywell Morley-Lite Fire Detection Control Panel series is ideally suited for Small to Medium Sized Buildings, Residential Complexes, Banks, Healthcare, Restaurants, Retail Stores etc. Morley Lite panels communicates via LiteSpeed™ protocol with Morley Lite detectors and devices.

Morley Lite Panel is built with Combination of quick installation, enhanced feature set and advanced programming which allows installer to meet demands of the end user with flexibility in configuration. Equipped with configurable remote monitoring inputs, programmable relays, delay setting for alarm verification, software isolation of class B circuit and NAC outputs, mapping of NAC to specific class B circuits, password protections etc.

End users get clear visible indications, easy to operate functions to activate the control buttons, customizable class B circuit text via text inserts to meet building naming conventions. Reliable and trouble free system built as per latest safety standards of industry which ensures system is safe and protected. Internal memory lock feature to restrict changes to fire panel configuration by any intruder without key lock.

FEATURES

Display: 16 X 4 Char LCD Screen.

Control Keys: Silence Buzzer, Silence/Resound Alarm, Reset, Evaluate, Accept delay. Indicators: Fault, NAC Fault, Earth Fault, Fire, Power, System Fault.

* Number of Programmable input might vary based on panel model, minimum 1 would be supported in all variants check installation manual for all details

** Each panel would have minimum 1 programmable input. 2 programmable inputs are made available on special request with prior confirmation.
