EXPERIENCE THE
CLOUD ADVANTAGE

MINIMAL
TRAINING REQUIRED

DATA SAFETY THAT
COMES WITH HONEYWELL

DATA
ACCURACY

The new software to automate time and attendance records smartly, safely and with increased efficiency.

- Intuitive information driven dashboard
- Employee self service
- Leave management
- Shift management
- Interface with 3rd party application e.g. HRMS, Payroll, etc
- User based customized report

THE BENEFITS OF CLOUD

- Data is safe & secure under Honeywell global policy.
- Save software installation time compared to on premises installation.
- No dependency on server/system pre-requisites.
- Real time accurate data which is always available on the go for further processing.
- No dedicated system is required for application installation saving infrastructure and application cost.

NO TRAINING REQUIRED

- Plug-n-play. No training required to connect devices.
- Saves installation time and learning hassles.
- Quick user enrollment from device and sync with software in real time.
- Fast & quick device integration with software.

User-friendly Service Portals for Master Administrators
(Company Owner, Head of the Business), Admin(HR, Office Admin), Supervisors, and Employees.

Hardware Interface

Currently interfaced with HON-BIO series where model numbers are – **500TA, 500TA & 3000WK** respectively.

Millennial employees prefer working on flexi-hour working schedules instead of the traditional clock-in and clock-out methods.

For progressive organizations, as much as this results in growth coming from multiple locations with flexi-working schedules at satellite offices; streamlining and syncing up the time-tracking with performance can really become a challenge for administrators. When you're able to streamline scheduling and communication through InTym's user-friendly platform, a world of new possibilities opens up.

USER FRIENDLY SELF-SERVICE PORTALS

It's a web based self-login portal where employees can check their attendance, apply for leaves, can correct their attendance through attendance regularization.

TIME AND ATTENDANCE REPORTING

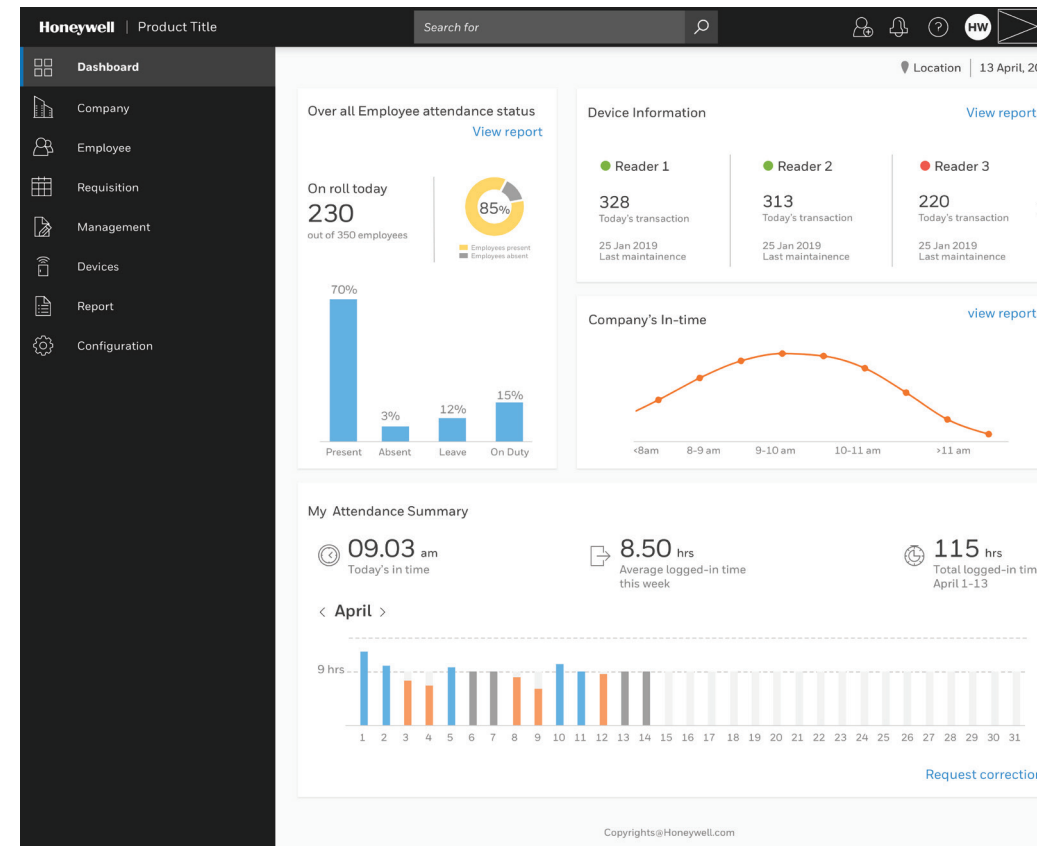

It's one of the unique tool in industry where admin can select their necessary field and create their own report. Further the same report can be exported in multiple format like .CSV, .TXT, .XLS. Also, same report can be automatically scheduled for specific location and user can define specific time to generate this report. This feature also can boast of tasks like report customization, filtering, and sorting capability.

SEAMLESS PAYROLL INTEGRATION

The time and resource costs attached with accurate processing clock-in records and attendance spreadsheets can add up to a huge bill for organizations. InTym's cloud based attendance makes this process seamless for your HR. It adds a great repertoire of analytic features resulting in better decision making by leadership. For example, one can set parameters to track paid holidays and differentiate between salaried and hourly workers; preset rules can be set for automatic approval or denial to employee requests when those criteria are met. Not to mention, the HR/Admin teams too can then direct their energies more productively.

Highly configurable dashboard with a simple, intuitive interface that has everything on a single screen. From location specific attendance status, location specific device status, overall trend of the user attendance, leave requests and approvals.

Honeywell's new time & attendance software allows supervisors and administrators to easily navigate employees' time and attendance data. Interfaces with 3rd party application through API interface including payroll/HR/ERP systems, eliminating double entry of shared information.

Easy To Manage Attendance Policies

Challenges of time-attendance vary from one organization to another, based on structure, hierarchy and operational needs. It is quite difficult to manage time-attendance rules of employees and to automate them as per the operation requirement. InTym provides Time-Attendance policies which can be custom defined as per the needs of different functions, departments.

Leave Management

Every business has its own different needs when it comes to managing leave. While operating on any scale, an organization has various leave policies for the different location. InTym leave management offers custom options to define the different type of leave, leave accumulation rules, leave balance calculation and auto leave credit. InTym also provides reporting and tracking leave application status.

Employee Self service

InTym provides ESS Request for OD, Leave, Attendance regularization & checking individual time card.

Intuitive Dashboards

From data to information which further leads to take critical decisions, InTym dashboards offering gives quick snapshot for the health of the organization with respect to employee presence/absent, Device - Online/offline, current behavior etc.

The most feature loaded software application that not just provide robust safety but also enables flexibility, efficiency and cost saving.

Integration with 3rd Party Software

InTym offers multiple APIs to interface with external 3rd party application in their required data format*.

Multiple Shift Scheduling & Shift Management

InTym has smart custom report features where user can select their own fields and export necessary data in required formats like .xls, .csv or .txt.

Advance Report Creation

InTym has smart custom report features where user can select their own fields and export necessary data in required formats like .xls, .csv or .txt.

Device Support

Currently InTym interface with HON-BIO series where model numbers are – 500TA, 5000TA & 3000WK respectively.
