

TEV-2

Smart AI Camera

Traditionally security cameras have been used to analyze events after they occur – limiting their impact on a threat or untoward event. The IMPACT by Honeywell TEV 2 camera overcomes this limitation by enabling proactive, real-time response. Some of the features that make this possible include AI analytics, live streaming, night vision up to 30 feet, wifi capabilities, and built-in mic & speaker. In addition, the AI-based detection capabilities of the TEV 2 ensure more than 95% accuracy - reducing false alarms - and its IP66 rated casing makes the device ideal for outdoor use.
