

# V5GV2S Series

## Steam Linear Valves

Honeywell V5GV2S series flange linear valves can work with ML8824 series linear actuators to control the steam or water flow of central air conditioning system and district heating system.

### Features

- Pressure balancing plug (DN32~DN150)
- Low leakage
- Metal sealing of valve seat for long life running
- Easy mounting of being directly coupled with ML8824 actuator

### Basic Parameters

|                                  |  |
|----------------------------------|--|
| Type                             | Two-way Linear Valves  |
| Action Direction                 | Stem down close  |
| Pressure Rating                  | PN16   |
| Size                             | DN15 to DN150  |
| Available Medium and Temperature | Cold and hot water: 0 °C to 130 °C<br>Steam: 0°C to 180°C<br>Medium standard: GB/T29044-2012   |
| Flow Characteristics             | EQ%  |
| Rangeability                     | 50:1   |
| Leakage                          | IV-S rating (JB/T 7387-2014)<br>Nominal value: $5 \times 10^{-6} \times$ Valve Capacity<br>Equivalent value: 0.001%kvs (water testing) or 0.04%kvs (Air testing) |
| Connection                       | Flange (ISO7005-2)   |
| Stroke                           | DN15~DN80: 20mm<br>DN100~DN150:40mm  |

## Order Information and Parameters

| V5GV2S125F-E | DN125 | 250         | 40           |                                  | —   | 600           |
| V5GV2S150F-E | DN150 | 360         | 40           |                                  | —   | 600           |

### Notes:

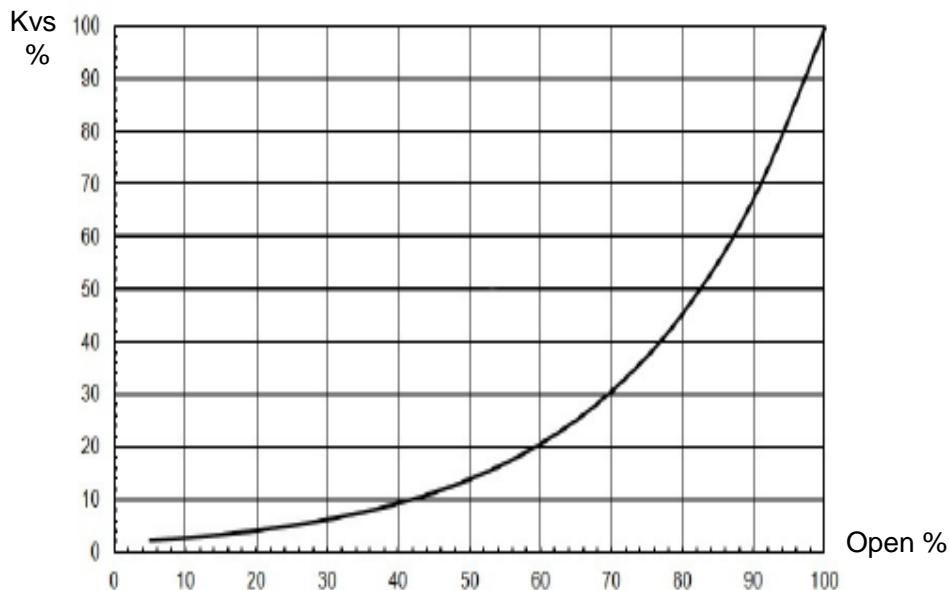

1. The close pressure differential (DP) is a comprehensive physical parameter formed by the matching of the valve and the actuator. It means that the valve is matched with a certain thrust actuator and the maximum DP that the valve can withstand when it is fully closed. Within this DP, the valve can open and close freely. , when selecting the valve, it is necessary to strictly refer to the close DP generated by the valve and actuator and the close DP required by the user. When selecting a steam valve, the close DP generated by the valve and actuator must be greater than the controlled steam pressure.
2. The close DP generated by the valve and matching actuator does not mean that the valve is suitable for steam at all pressure values below the close DP value. For the applicable steam pressure range of the valve, you need to refer to the applicable medium temperature range of the valve and check the steam temperature-pressure comparison table to ensure that the medium temperature used is within the allowed medium temperature range of the valve and leaves a safety margin.

## Products structure and Material

| # | Part   | Material                     |
|---|--------|------------------------------|
| ① | Stem   | SS304                        |
| ② | Seal   | PTFE+ Stainless Steel Spring |
| ③ | O-ring | Fluororubber                 |
| ④ | Bonnet | Ductile iron QT450-10        |
| ⑤ | Body   | Ductile iron QT450-10        |
| ⑥ | Plug   | SS304                        |
| ⑦ | Seat   | SS304                        |

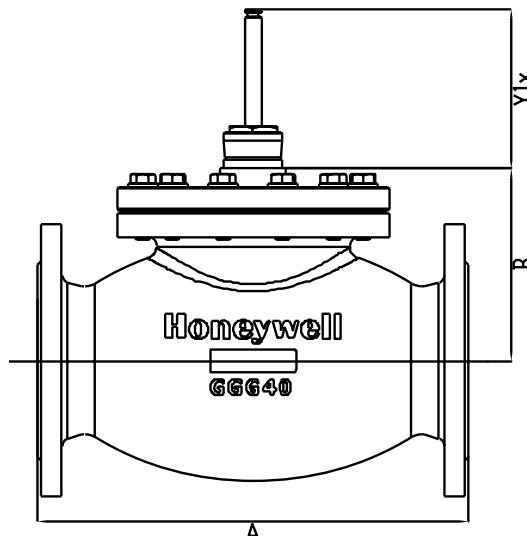

## Flow Characteristics Curve

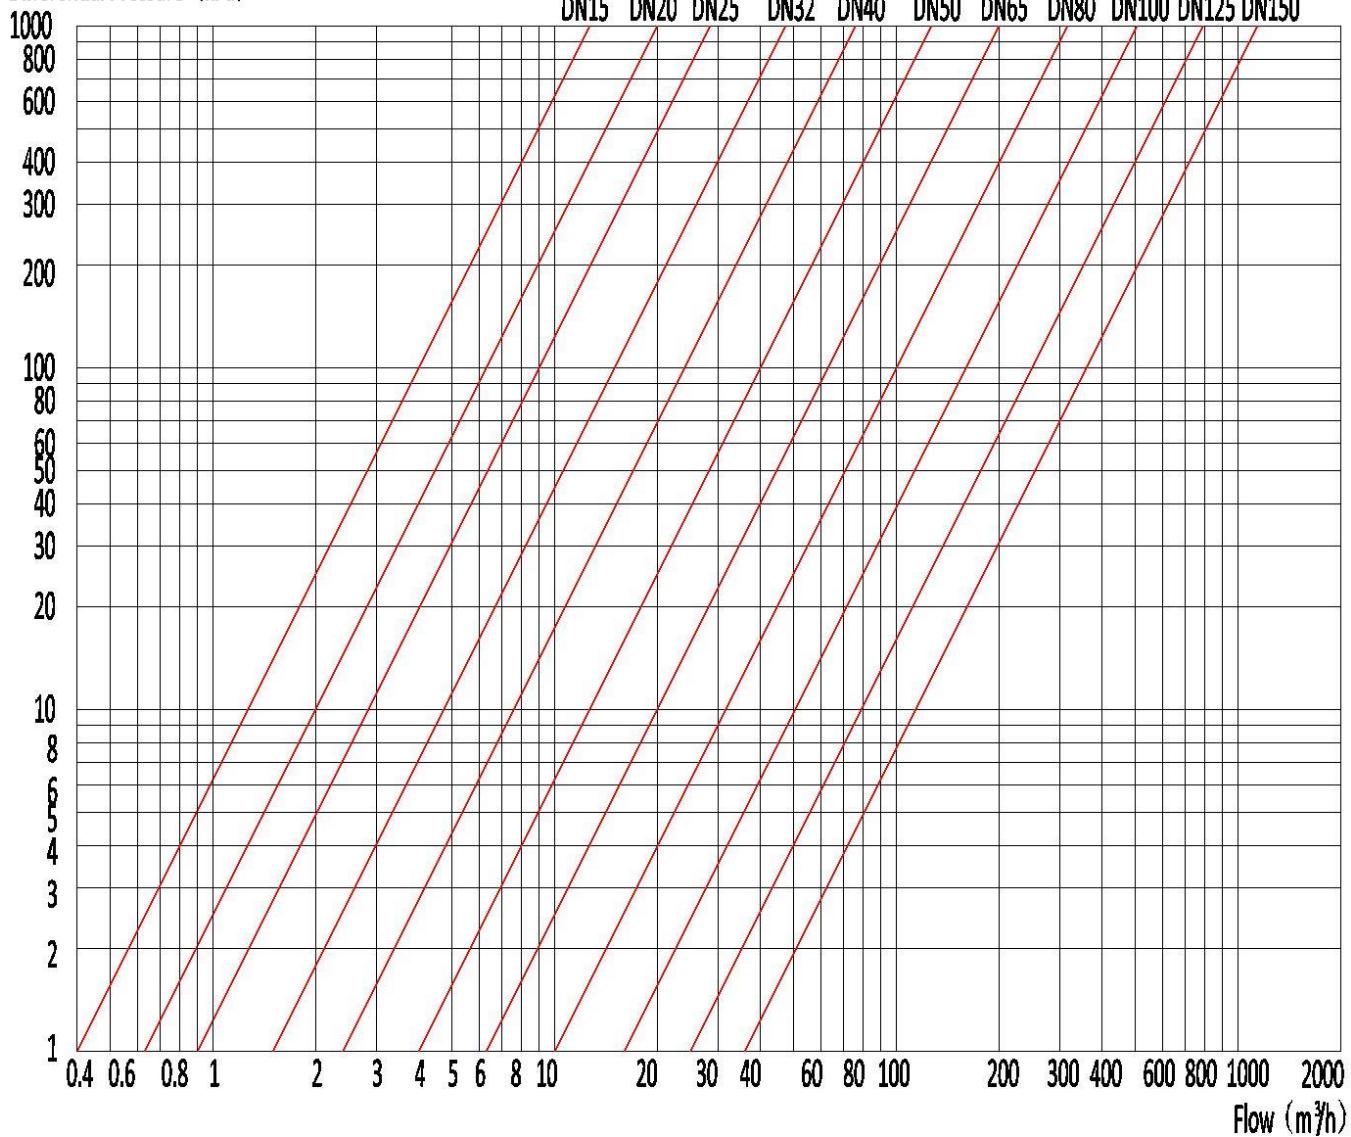

## Dimension (mm) and Weight (kg)

| SKU          | DN    | A   | B     | Y1 <sub>x</sub> | Weight |
|--------------|-------|-----|-------|-----------------|--------|
| V5GV2S015F-E | DN15  | 130 | 76.3  | 87              | 3.4    |
| V5GV2S020F-E | DN20  | 150 | 76.3  | 87              | 4.0    |
| V5GV2S025F-E | DN25  | 160 | 78.3  | 87              | 4.5    |
| V5GV2S032F-E | DN32  | 180 | 93    | 87              | 7.2    |
| V5GV2S040F-E | DN40  | 200 | 93    | 87              | 8.4    |
| V5GV2S050F-E | DN50  | 230 | 105.5 | 87              | 11.5   |
| V5GV2S065F-E | DN65  | 290 | 120   | 87              | 17.5   |
| V5GV2S080F-E | DN80  | 310 | 132.5 | 87              | 24     |
| V5GV2S100F-E | DN100 | 350 | 156   | 131             | 34.5   |
| V5GV2S125F-E | DN125 | 400 | 174   | 131             | 48     |
| V5GV2S150F-E | DN150 | 480 | 196   | 131             | 64     |
