# SMART AND BEAUTIFUL

Honeywell's INNCOM guest room Management System now includes the Elements range which showcases new, materials and finishes for greater choice and flexibility.

The Elements collection is a revolutionary range of stylish wiring devices and guest room controls devices. Innovative, iconic and inspiring, the Elements collection is the perfect fusion of distinctive design and unparalleled quality. Inspired by materials such as metal, stone and glass, and with electronic touch control switches and dimmers, the MK Elements collection offers the perfect companion for any interior design.

- High quality finishes with ultimate flexibility
- Comprehensive range of products including a thermostat, switches, sockets, and modular ancillary products designed for hospitality
- Unrivaed quality and reliability

# SWITCHES

Elements switches are beautifully designed, easy to use lighting, drape, and amenities interfaces. Elements is available in up to a 6 button keypad or up to 2 dimmers or in combination plates that provides AC power, USB charging, Audio/ Video connectivity along with guest room controls in a single plate. This provides an easy to use, powerful interface to the room functionality.

Our environmentally friendly systems can easily be set up to comply with energy-conservation building codes and can include an occupancy based or key card based master light control to ensure that lights are always off in unoccupied rooms. Our lighting and drape controls provide comfort, safety and convenience, too. Automatic night lights and entry welcome lights guide guests in an otherwise darkened room,

while multi-point control makes it easy for guests to adjust lighting from virtually anywhere in the guest room. Guest privacy and convenience can additionally be optimized through Do-Not-Disturb, Make-Up-Room, and other service call functionality.

# INNCOM ELEMENTS GUEST ROOM AUTOMATION RANGE

Elements is a beautifully designed, easy to use range of devices that allow your guests to control comfort, lighting, drapes and other amenities. It allows you to control your energy costs while providing an ideal guest experience. Available in custom finish materials a range of hospitality specific functions with intuitive icons, Elements thermostat and switches are designed into the room experience.

# THERMOSTAT

The Elements thermostat is a beautifully-designed intelligent programmable thermostat providing as much functional flexibility as it does design. It wakes at the first touch and easily allows the guest see the current temperature and adjust the temperature as they wish. When coupled with one or more a occupancy sensors it creates a room-level energy management system (EMS) and will automatically set back the comfort level when the room is unoccupied resulting in significant energy savings for your business.
