

FAQ's

- Which types of AC does it work with?

The IR AC Controller works with any remote-controlled AC. The common examples are Split AC, Cassette AC and Window AC.

- Which type of battery is used?

The IR AC Controller works on three standard AAA batteries.

- How is it mounted?

There are two options to mount the IR AC Controller on the wall; first is using screws and the second is using double sided tape.

- How does the IR AC Controller control the AC?

The IR AC Controller controls the AC using Infra-Red signals just like the AC remote. There is no interference with the power supply of the AC.
